MR. ANTHONY A. GALLEGOS
STATE OF UTAH
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF OIL, GAS AND MINING
RECLAMATION ENGINEER

Re. Status of Large mining Operations Notice of Intention, Akzo Salt Inc. Timpie Solar Ponds, M/045/030, Tooele County, Utah

Dear Mr. Gallegos:

This letter is in response to your letter dated 11/10/93. After reviewing your letter Akzo proposes the following.

Issues from the Division December 22, 1992 Review Letter

Please reference map "Akzo Salt Inc.
Salt Processing Facilities
Timpie Point, Utah"

Roads with/without a post - mining land use

✓ Akzo proposes that all roads in plots A and B should be identified as necessary for post mining use. Roads in plots C, D and F are there for the propose of managing the salt stock pile area, therefore these will have no post mining use.

Requirements to import soil

✓ If revegetation standards cannot be met in plots C and F there are three viable sources for top soil. Akzo is in the process of acquiring 25 acres of land five miles south of the Timpie facility. There is private gravel/borrow pit five miles south and a BLM gravel/borrow pit within eight miles of the facility.

If the division could estimate the depth of the soil to be spread then Akzo will determine the source for the borrow and calculate the cost to place this material at Timpie. 12"

Seed mix

✓ Akzo accepts the seed mix and volumes for application listed by the Division.

	<u>lbs/Acre</u>
Grasses	
Crested wheatgrass	3
Alkali sacaton	1
Bluebunch wheatgrass	3
Indian ricegrass	4
Shadscale	2
Forbs	
Yellow sweetclover	3
Trees and Shrubs	
Fourwing saltbush	3
Rabbitbrush	2
Sagebrush	2

Total lbs/acre = 23

Post mining use.....

Akzo and division needs to meet on this issue. Since the site inspection in April 1993 Magcorp and Akzo have finalized a contact which allows Magcorp first rights on all properties abandoned by Akzo. This issue can be discussed during the meeting.

Proposed surety form and completed reclamation Contract...

Akzo will be in touch with the division by phone in order to complete this issue.

Construction of berm or trench near east fence line....

Akzo has completed this trench which should protect the property east of the Timpie facility.

Akzo will provide a fuel spill plan or Spill Prevention Control and Countermeasures (SPCC)....

Akzo is currently working on the plan, draft attached, and hopes to have it complete by the end of June 1994.

Sincerely,

Dan Bauer
Plant Manager
Akzo Salt Inc.
